VENTED CHASE OPTION

The chase of the appliance may be vented to achieve Cool Touch Walls or reduced Mantel Clearances. The following options are available to vent the chase:

- The top of the chase can be left open.
- A grill can be installed on the front of the chase.
- If the chase bumps out into the room, side grills can be installed on each side of the chase.

See illustrations and manual for further information.

Minimum enclosure height for a vented chase is 70" from bottom of fireplace, ventilation of a 105 in² of minimum free air opening is required. Choose between our V46EG Enclosure Grill or Custom Grill (if custom grills are used the louvers cannot slope) or adequate ventilation opening as stated in the manual. Grill or opening must be within 2" of chase top/ceiling.
