LIGHTING UPGRADES

Multicolor LED backlights – 9 different colors

TOUCH SCREEN TECHNOLOGY

Directly below the flame on the right hand side you will find a series of touch controls. The 3 stacked icons (in order) operate the power, heat (on/off) and light intensity. Hold the light intensity for 5 sec to change the back screen color from orange to blue. To the right of the stacked icons you will see a digital readout with arrows on the top and the bottom. The digital readout indicated the temperature the thermostat is set too. Touch the arrows above or below the digital readout to increase or decrease the set temperature. All touch controls fade to black after 4 seconds.

REMOTE CONTROL
